

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
<b>2</b>	<b>Symmetries</b>	<b>1</b>
2.1	Isometries of the plane . . . . .	1
2.2	Fixed points . . . . .	5
2.3	Symmetries of a set of points . . . . .	7
2.4	Products of two reflections . . . . .	8
2.5	Parity . . . . .	10
2.6	Odd isometries . . . . .	12
2.7	Rosette groups . . . . .	13
2.8	Conjugacy . . . . .	16
2.9	Frieze groups . . . . .	18
2.10	Wallpaper groups . . . . .	21
2.11	Final remarks on discrete symmetry groups . . . . .	36
<b>3</b>	<b>Tilings</b>	<b>37</b>
3.1	Basic definitions . . . . .	38
3.2	Tilings by regular polygons . . . . .	42
<b>4</b>	<b>Wang tiles</b>	<b>48</b>
4.1	Periodic tilings . . . . .	49
4.2	Compactness principle . . . . .	51
4.3	Robinson's aperiodic tile set . . . . .	52
4.4	An aperiodic set of 14 Wang tiles . . . . .	56
<b>5</b>	<b>Undecidable problems concerning tiles</b>	<b>61</b>
5.1	Turing machines . . . . .	63
5.2	The tiling problem with a seed tile . . . . .	65
5.3	Finite systems of forbidden patterns . . . . .	67
5.4	The periodic tiling problem . . . . .	69
5.5	The tiling problem . . . . .	73
5.6	The completion problem . . . . .	78
5.7	Beyond aperiodicity: arecursive tile sets . . . . .	81
<b>6</b>	<b>Compact topology on Wang tilings</b>	<b>84</b>
6.1	Review of topology and metric spaces . . . . .	85
6.2	Basic facts about the configuration space . . . . .	91
6.3	Subshifts . . . . .	92
6.4	Orbits, transitivity and minimality . . . . .	93
6.5	Periodicity and recurrence properties . . . . .	95
6.6	Equicontinuity and isolated points . . . . .	98
<b>7</b>	<b>A brief revisit to tilings by polygons</b>	<b>99</b>
